

CALVIN SEMINARY'S COVID GUIDELINES - FALL 2022

Calvin Seminary's COVID Response Team has been discontinued as of the conclusion of the 2021–22 academic year. A small team of people will continue to monitor COVID and meet as necessary, especially if we were to see a significant increase in case counts on campus or locally.

Calvin Seminary will continue to follow the guidance of the Kent County Health Department (KCHD), the Michigan Department of Health and Human Services (MDHHS), and the Centers for Disease Control and Prevention (CDC). We encourage Calvin Seminary students, staff, and faculty to stay informed about COVID via the numerous reputable sources currently available and via their own health care providers.

We have discontinued reporting our COVID cases in the CTS E-News as of May 31, 2022, at the end of the spring semester. Our small team will continue to monitor case numbers at the Seminary, as well as data from Kent County and the State of Michigan, and keep the Seminary community informed of any significant developments.

VACCINATION, TESTING, & REPORTING INFORMATION

VACCINATION: We encourage all students, staff, and faculty to be fully vaccinated and boosted for COVID-19. Vaccines can be obtained through a local health provider, the health department, or pharmacies. [Check here to find a location in West Michigan.](#)

TESTING: There are several places/websites where you can obtain testing for COVID19.

- Get free government testing kits at <https://www.covid.gov/tests>
- Kent County testing and vaccine clinics include Baxter and Cherry Clinics. Get more information here: <https://www.accesskent.com/Health/covid-19-testing.htm>
- Check with your health insurance provider about coverage for COVID tests. Often insurers will cover those who are referred by a physician and/or have symptoms, but not cover those who are asymptomatic. Find out what is covered before you get tested.

REPORTING: If you have symptoms and/or you are diagnosed with COVID-19, please report your situation [by using our online reporting form](#). This information is kept confidential and will help us to assess trends or concerns regarding COVID in the Seminary community.

If you have a positive test result for COVID or have been exposed to COVID, we encourage you to use [the CDC's online tool](#) or [the MDHHS' guidance](#) to determine how you should
